🪪 Profile

I am a software developer interested in mobile devices and applications, developing applications by learning, researching, and producing innovative and user-friendly solutions that make people's lives easier. In addition, I am constantly improving myself as a team-oriented software developer who adds value to projects.

💼 Professional Experience

Papara Kotlin Android Bootcamp
04/2024 - 06/2024

Rise In - Patika

Kotlin ile Android Mobil Uygulama Geliştirme İleri Seviye
BTK Akademi

Kotlin İle Android Mobil Uygulama Geliştirme Eğitimi Temel Seviye
BTK Akademi

Versiyon Kontrolleri: Git ve GitHub
BTK Akademi

🎓 Education

Faculty of Theology
Dokuz Eylul University
2018 - 2023

Computer Programming
Anadolu University

📁 Projects

İzmir Su Kesinti Takip ⬈
Android Mobile Application
The Izmir Water Outage Tracking application was developed using the Izmir Metropolitan Municipality's Open Data Portal, which provides information about the location and time of water outages.

Technologies I use: MVVM, View Binding, Live Data, Lifecycle, Retrofit
Cookly ⬈
Papara Android Bootcamp Final Case
Cookly is a recipe application where users can browse recipes in different categories, access detailed information about recipes, and access their favorite recipes without the internet.

Technologies I Use: Jetpack Compose, MVVM, Room, Retrofit, Dependency Injection (Hilt), Navigation Component, Flow, Coil

ChatChef ⬈
Papara Andorid Bootcamp Group Project
Chat Chef is an interactive chat application that users can use to ask food-related questions and get suggestions. This app allows users to explore the food world using the ChatGPT API.

Technologies I Use: Jetpack Compose, MVVM, Room, Retrofit, Dependency Injection, Firebase, Navigation Component
